WHAT IS A FARM?

It has been said that a farm is something a city dweller always dreams of at 5:00 p.m., but never dreams of at 5:00 a.m.

A farm is an economic powerhouse. The average South Dakota farmer feeds 76 people. His Russian collective counterpart feeds only five.

A farm is also a provider of jobs for Americans. Every time the value of American farm exports increases by one billion dollars, over 32,000 jobs are created.

And a farm is a provider of the American consumers' greatest bargain. Farmers today get less than 30 cents of every dollar that Americans spend for food; the rest goes for processing, packaging, advertising, and transportation costs.

Above all else, a farm is part of America's heritage. Of the 56 patriots who signed the Declaration of Independence, 32 were farmers. Their spirit still lives and works in South Dakota today.

PREFACE

Acknowledgement is given to the Office of Agricultural Development, South Dakota Department of State Development for funding this issue of South Dakota Agricultural Statistics.

This bulletin presents state and county crop data, state price and income data for 1979-84, and state livestock data for January 1, 1979-85. Some United States data is shown for comparative purposes. For earlier year's county crop data refer to South Dakota Historic Estimates 1970-75 and 1976-80.

All current data in this bulletin is preliminary and subject to revision the following year and also after review of the United States Census data each five years.

Acknowledgement is given to the many South Dakota farmers, ranchers, and merchants as well as numerous commercial, educational, and government agencies who have voluntarily contributed basic information used in compilation of these data. Preparation of this publication was done by the staff of the South Dakota Crop and Livestock Reporting Service.

WEATHER-CROP SUMMARY

GENERAL: South Dakota's 1984 weather started with above normal temperatures and below normal precipitation for January. Temperatures remained above normal during February with heavy snow in some areas late in the month. March's temperatures fluctuated drastically. Precipitation was above normal across the south and east during April causing widespread flooding in the southeast. A blizzard in late April left 1 to 4 feet of snow and caused significant livestock losses. Fieldwork progressed slowly during May, but small grain seeding neared completion by the end of the month and row crop planting got started. June brought more rain and flooding at mid-month, which drowned out crops and again held up planting. Row crop planting was nearly complete by mid-July, but armyworms, greenbugs, and corn borers invaded the east and grasshoppers took over the west. Small grain harvest was well underway during August. A killing frost during the last week of September caused some damage to late planted crops and hastened the development of mature crops. October was wet and cool, halting row crop harvest. November was dry and windy, which enabled harvest to continue and be completed by the end of the month. Temperatures during December averaged at or below normal.

JANUARY: January brought above normal temperatures throughout most of the month. Less than normal precipitation fell across the State. The heaviest snowfall occurred during the second week with accumulations of 1 to 10 inches.

FEBRUARY: Temperatures remained above normal for the State throughout February. Precipitation was light most of the month except during the third week when up to 11 inches of snow fell in some areas of the State.

MARCH: Temperatures ranged from above normal to well below normal during the month. The western two-thirds of the State continued to have below normal precipitation while the eastern one-third was near or above normal.

APRIL: Temperatures averaged near normal during the entire month. Precipitation was above normal across the south and east during most of the month, with widespread flooding occurring in the southeast. A blizzard in the west, during the last week of April, left from 1 to 4 feet of snow and caused significant livestock losses. Spring planting got off to a slow start late in the month.

MAY: Fieldwork progressed slowly at the beginning of the month but picked up during the third week. The southeast remained wet, with flooding common until mid-month. Temperatures averaged below normal but warmed slightly and the wind helped dry some of the moisture in the southeast. The remainder of the State had mostly short to adequate moisture supplies during the month. Small grain seedings neared completion by the end of May and row crop planting was well underway.

JUNE: Spring planting and growth continued at a good pace during the first two weeks of June, however, rain and flooding hit again at mid-month. Crops already planted were being flooded out in the southeast. Most of the State had surplus topsoil moisture supplies and needed the good drying weather received during the last week of the month.

JULY: Row crop planting was nearly complete by the second week of July. Most of the State continued to have adequate moisture. Temperatures averaged near normal. Small grain harvest got started mid-month. Armyworms, corn borers, and greenbugs invaded the east and grasshoppers took over the west.

AUGUST: Winter wheat and rye harvest finished up in early August. Crop progress was behind normal most of the month, but caught up by the end. Grasshoppers continued to cause problems in the west and started moving east. Greenbugs and seed weevils also moved in. Temperatures averaged above normal.

SEPTEMBER: September was dry with variable temperatures. Row crop harvest got started about the middle of the month. A killing frost during the last week of September caused some damage to late planted crops and hastened the development for those crops already mature.

OCTOBER: Wet, cool weather slowed crop dry-down and forced harvest to a near standstill throughout most of the month. At the end of October, most of the crops were mature, but less than half of the crops had been harvested.

NOVEMBER: Dry, windy weather during the first week of November helped crop dry-down and harvest got underway again. Temperatures were mild throughout the month. Harvest was completed by the end of November.

DECEMBER: Temperatures averaged at or below normal during the month. Snowfall was light the first half of December. By the end of the month, snowcover ranged from 1 inch in the southeast to 8 inches in the northwest.

CROP PRODUCTION

SOUTH DAKOTA

Production of most major crops increased substantially in 1984 from the Payment-In-Kind and drought stricken crops of 1983. Only sorghum silage and fall potatoes showed any decrease. All wheat production was up 40 percent because of record winter wheat and other spring wheat crops. Winter wheat increased 19 percent to a second consecutive record of 61,200,000 bushels. Other spring wheat production set a new record of 61,710,000 bushels and was up nearly 70 percent from 1983. Durum wheat showed a 50 percent increase. Corn for grain production increased 78 percent from 1983's PIK and drought affected crop. Oat production was nearly 10 percent above previous year. Barley was the largest crop since 1948 and was up 31 percent from 1983. Rye production jumped almost 24 percent and was the largest crop since 1971. Flaxseed production showed a more modest 9 percent increase. Sorghum for grain and sunflower production increased 36 and nearly 41 percent respectively. Soybeans continue to gain in popularity as production was another record 31,280,000 bushels. All hay production was at its second highest level at 8,083,000 tons.

Crop yields were up for all small grains except winter wheat while there was no pattern for other crops. Other spring wheat and durum wheat yields each set new record highs with 33 and 34 bushels to the acre, respectively. Even though the winter wheat yield of 36 was 5 bushels below 1983, it tied the second highest yield recorded for that crop. Corn for grain increased 14 bushels per acre. Oats increased 8 bushels to a yield of 56 bushels per acre. Soybeans dropped 3.5 bushels primarily because of late plantings and an early fall freeze. Barley and rye yields set new record highs of 51 bushels and 40 bushels per acre, respectively, while flaxseed tied the previous record of 14.5 bushels. Sorghum for grain and all hay were unchanged from 1983 with grain sorghum yielding 47 bushels per acre and all hay producing 1.88 tons per acre.

Planted acres of the principal crops grown in South Dakota totaled nearly 16.7 million acres in 1984, more than 18 percent above 1983's PIK affected acreage. All wheat seedings increased 915,000 acres to 3,995,000 acres. Winter wheat acreage jumped to 2.0 million acres while other spring wheat increased to 1.9 million and durum wheat increased to 95,000 acres. All corn plantings increased nearly one million acres to 3.4 million but was at the same level as 1982. Soybeans planted continue to increase and were at 1.4 million acres in 1984. Oats planted decreased 300,000 acres; flaxseed dropped 5,000 acres; potatoes planted declined 500 acres and were the only crops to show a decline from 1983.

Harvested acres of major crops totaled nearly 16.3 million, 20 percent above 1983's PIK and drought affected acreage. Sorghum for silage, oats, flaxseed and potatoes were the only crops to show a decline from the previous year.

UNITED STATES

The Nation's production of every major crop except oats and sorghum silage increased significantly from 1983's government program and drought reduced levels.

A variety of abnormal and changing weather patterns prevailed in 1984. Unusually warm weather in early January melted the snow cover over much of the Great Plains, leaving winter grains exposed to possible winterkill. Bitter cold temperatures moved as far south as Texas at mid-month. A return to abnormally warm temperatures in February again left winter grains with little or no protective snow cover. March rains delayed spring fieldwork across the Central Plains and Corn Belt. Untimely April rains limited land preparation and planting. Wet conditions throughout the month hampered corn planting. Five percent of the acreage was planted by late April, well behind the 13 percent average. May's widespread rainfall further delayed field activities. Unusually cool temperatures slowed crop emergence and development for most of the month from the Northern Plains to the east coast. However, by early June, 90 percent of the corn acreage was planted, slightly behind normal. Soybean planting reached 51 percent completion by June 3, trailing the 60 percent average. Dry weather in mid-July allowed rapid small grain combining from the Central Plains into parts of the Corn Belt. Persistent hot, dry conditions in August across the Great Plains and Corn Belt rapidly advanced small grain maturity, increased moisture stress on row crops, and caused pasture and range deterioration. A late September, unusually hard freeze halted plant growth across the Northern and Central Plains and most of the western Corn Belt. However, damage was minimal because most crops were mature. Corn combining was active in all States by late September. Soybean harvesting trailed the average in half the major States. Corn harvesting neared the halfway mark as October ended. Soybean harvesting was seriously delayed by rain across the major producing area, reaching 46 percent completion by the end of October. Corn harvesting was slightly behind schedule while soybean harvesting was 91 percent complete, 5 points lower than normal at the end of November. Frozen soils across the Corn Belt allowed some combining of the remaining corn and soybean fields for a short time during December.

Area of principal crops planted or grown in 1984 totaled 345 million acres, up 35 million acres from 1983, primarily because of government programs to reduce crop acreage in 1983, but 14 million acres below 1982. The major crops showing increases in planted acreage from 1983 were: corn, 34 percent; sorghum, 45 percent; barley, 14 percent; all wheat, 4 percent; and soybeans, 6 percent. Oat acreage was down 39 percent. Oat plantings were unusually high in 1983 when growers seeded for cover the acreage taken out of production and placed in the Payment-In-Kind program. Harvested area of principal crops totaled 336 million acres, up 42 million acres from 1983, but down 14 million acres from 1982.

COMMERCIAL FERTILIZER

Commercial fertilizer sales in South Dakota increased 17 percent in the fiscal year ending June 30,1984. There were 399,195 tons (including carrier) of commercial fertilizer sold in fiscal year 1984. Actual nutrients (NPK) totaled 202,192 tons, up 18 percent. Except for 1983, fertilizer usage in 1984 was the lowest since 1978.

Nitrogen accounted for 63 percent of the total NPK. Phosphoric acid accounted for 29 percent and potash accounted for 8 percent.

The fertilizer 18-46-0 continued to be the most widely used analysis in fiscal year 1984 with 80,092 tons. The second most popular analysis used was 10-34-0 with 10,202 tons. These two fertilizers accounted for nearly 23 percent of all fertilizer used in South Dakota during fiscal year 1984.

CATTLE

The January 1, 1985 inventory of all cattle at 4,160,000 head was 1 percent less than the previous January 1 count of 4,220,000. The 1984 calf crop of 1,800,000 head was unchanged from the 1983 calf crop. Average value per head of all cattle on January 1, 1985 was $400, up $5 from January 1, 1984. Cash receipts from sales of cattle and calves in 1984, at $1,202 million, were 13 percent above last year.

HOGS

The number of hogs and pigs on farms in the State on December 1, 1984, at 1,600,000 head, was 8 percent below a year earlier. The average value of all hogs and pigs was $77.00 per head compared to $54.50 a year ago. The total value of hogs and pigs on December 1 was $123 million, up 31 percent from a year earlier. Cash receipts from marketings of hogs and pigs were $296 million, up 7 percent from 1983. The pig crop for 1984 was 2,526,000, down 1 percent from 1983. There was a decrease of 2 percent in the spring pig crop and a decrease of 1 percent in the fall pig crop.

SHEEP

The number of sheep and lambs on South Dakota farms and ranches on January 1, 1985, at 639,000, was 14 percent below January 1, 1984. Stock sheep numbered 564,000, down 15 percent from 1984 and sheep on feed numbered 75,000 head, down 6 percent from 1984. The 1984 lamb crop, at 610,000 head, was down 6 percent from 1983. Average value per head of all sheep on January 1, 1985, was $53.00 compared to $50.00 on January 1, 1984. Cash receipts from sales of sheep and lambs during the year totaled $36 million, up 18 percent from a year earlier. Sheep and lambs shorn during 1984, totaled 740,000 head, an increase of 2 percent. Average fleece weight of shorn wool was 8.6 pounds per head, down 0.3 pound from 1983.

MILK PRODUCTION

South Dakota milk production in 1984 totaled 1,691 million pounds, down 8 percent from 1983. There was a decrease of 4,000 head in the number of milk cows, and the production per cow decreased 580 pounds in 1984. There were 6,000 operations in the State with milk cows in 1984, down 6 percent from 1983.

POULTRY AND EGGS

The number of chickens on farms on December 1, 1984 was 1,940,000, an increase of 2 percent from a year earlier. Egg production in 1984 was 378 million eggs, up 1 percent from 1983 and cash receipts from eggs at $14.8 million were up 16 percent from last year. Cash receipts from the sales of turkeys added $17.5 million to gross income in 1984.

UNITED STATES

CATTLE

The Nation's farmers and ranchers had 110 million cattle and calves in their herds on January 1, 1985, down 3 percent from the 114 million on hand a year earlier. This continues the recent downward trend in cattle inventories begun two years ago. The number of beef cows decreased 6 percent and the number of milk cows declined 3 percent. The value of cattle and calves on farms and ranches January 1, 1985, amounted to $44.1 billion, a decrease of 2 percent from a year ago. The average value per head increased from $396 on January 1, 1984 to $402. The 1984 calf crop is estimated at 42.5 million, down 3 percent from 1983. The Nation's 1984 milk production was down 3 percent from the previous year. The number of cows milked was down 2 percent and the production per cow was down 1 percent from 1983.

HOGS

Hog and pig numbers in the Nation on December 1, 1984, at 54 million head, were down 5 percent from a year ago. The average value per head was $75.00 compared to $58.80 on December 1, 1983. Total value of all hogs and pigs on hand December 1, 1984, was $4.1 billion, an increase of 22 percent from a year earlier. The 1984 pig crop totaled 86.5 million head, 7 percent below 1983.

SHEEP

Sheep and lamb numbers in the United States on January 1, 1985, totaled 10.4 million head, down 9 percent from a year earlier. This is a record low inventory for all sheep and lambs. Stock sheep decreased 9 percent and sheep on feed decreased 7 percent. The average value per head of all sheep and lambs increased $9.00 from last year to $61.10 per head on January 1, 1985, resulting in a total value of $638 million. The 1984 lamb crop of 7.8 million head declined 5 percent from the 1983 lamb crop.

POULTRY

Chicken numbers on December 1, 1984, totaled 374 million, up 2 percent from a year earlier. Layer numbers during 1984 averaged 278 million compared with 276 million during 1983. Egg production in 1984 was 68.2 billion eggs, about the same as 1983 production. Turkeys raised in the United States during 1984, at 171 million, were virtually unchanged from the 1983 level.

SOUTH DAKOTA

INCOME

The preliminary 1984 South Dakota cash receipts from farm marketings, excluding government payments, totaled $2,726 million, an increase of 5 percent from the $2,586 million in 1983. Sales from all livestock, poultry, and their related products accounted for $1,637 million, or 60 percent of the 1984 total. Sales from all crops accounted for a record $1,089 million. The 1984 total for all livestock products was down 1 percent from 1983, but the 1984 cash receipts from all crops was up 17 percent from 1983.

Including government payments, the total 1983 cash receipts from farm marketings was $2,853 million. Livestock marketings accounted for 58 percent of the total, crop marketings accounted for 33 percent of the total, while government payments accounted for a record 9 percent of the total in that PIK influenced year.

Cattle and calves remained the largest income source in 1983, accounting for 37 percent of the total. Wheat and hogs were second and third, accounting for 11 percent and 10 percent of the total, respectively.

Government payments to South Dakota farmers totaled a record $267 million in 1983, compared to $93 million in 1982. Payments from the Feed Grains and Wheat Programs brought in $50 million and $37 million, respectively. Payments from the PIK dominated miscellaneous programs totaled $177 million.

Farm production expenditures during 1983 totaled $2,551 million, down 3 percent from 1982. The 1983 realized net farm income in the State totaled $511 million, almost double that of 1982. Realized gross income per farm increased to $82,741 in 1983 from $77,122 in 1982. Realized net income per farm made a more dramatic jump from only $6,942 in 1982 to $13,799 in 1983.

Realized net income is a measure of the change in farmers' income position, but does not include the value of changes in farm inventory. Total net income per farm rose 13 percent to $12,650 in 1983. Total net income does include changes in farm inventory values.

PRICES

The 1984 season average prices for all crops but hay were down from 1983 levels. Wheat was down 31 cents to $3.36 per bushel. Rye dropped 30 cents to $1.75 per bushel, its lowest level since 1972. Corn and grain sorghum prices dropped 58 and 42 cents to $2.45 and $2.04 per bushel, respectively. Oat prices dropped 4 cents while barley dropped 34 cents. Flaxseed dropped 52 cents, and soybeans fell $1.83 from its record level of $7.63 per bushel in 1983. Sunflower prices fell $2.70 per cwt. to $10.70. The all hay season average price showed the only increase from $40.50 to $48.50 per ton.

The 1984 average prices for meat animals were both up and down from 1983. Hog prices remained unchanged for the year at $46.70 per cwt. The average price for beef increased 70 cents to $57.80 per cwt. Lamb prices jumped $6.20 per cwt. to $60.50 for the yearly average, but sheep prices fell $1.10 per cwt. to $16.00 for 1984.

UNITED STATES

INCOME

The 1983 United States cash receipts from farm marketings including government payments totaled 148 billion, virtually unchanged from 1982. Of the 1983 total, 47 percent resulted from the sales of livestock, poultry, and related products. Crop sales also accounted for 47 percent of the total, with government payments covering the remaining 6 percent. The five leading states for farm cash receipts in 1983 were California, Iowa, Texas, Illinois, and Minnesota. South Dakota ranked twenty-fourth in total cash receipts, twenty-sixth in crops, and seventeenth in livestock receipts. The five leading states for livestock receipts in 1983 were Texas, Iowa, California, Wisconsin, and Nebraska, in that order. The top five states in crop cash receipts were California, Illinois, Iowa, Texas, and Florida. The leading states for individual commodities were Texas for cattle and calves, Illinois for corn, Iowa for soybeans and hogs, and Kansas for wheat.

Realized gross income per farm for the United States increased one-half of a percent in 1983 to $68,839. Realized net income per farm increased 13 percent in 1983 to $11,747. Total net income per farm fell $2,513 from $9,306 in 1982 to $6,793 in 1983.

PRICES

Nationally, prices received by farmers in 1984 for most major crops were down from 1983. Corn prices dropped 56 cents to $2.69 per bushel, and soybeans fell $1.68 to $6.13 per bushel. Grain sorghum averaged $2.37 per bushel, a decrease of 47 cents from 1983. Barley prices dropped an average of 24 cents per bushel to $2.26. Oat prices showed an increase of a nickel, to $1.72 per bushel. Wheat and rye prices both fell, 16 and 25 cents, respectively.

The United States 1984 average price for beef cattle at $57.30 per cwt. was up 3 percent from 1983, while calf prices fell 3 percent to $59.90 per cwt. The average hog price at $47.10 per cwt. was up 1 percent over 1983. Lamb prices averaged $60.10 per cwt., up 12 percent from 1983, and sheep prices at $16.40 per cwt. were up 4 percent.
